

Bypass & Rack PDU 1-3 Kva

PHSR-BP013

This external bypass has been specially designed for UPS from 1 to 3 kVA. In Normal Mode, the grid powers the UPS which in turn powers the output load. In Bypass Mode, the output load is powered directly by the grid and the UPS is completely isolated. It can even be removed from the electrical circuit for easy maintenance or even for a replacement

Dimensions: 440x180x60mm (1.4u)
Weight: 2.15kg

 Voltage: 220/230/240 VAC 16 A

 Bypass Output: (16A) 1x IEC320 type C19

Output:

 Current Input: Max 1x IEC320 type C20

 Bypass Input:(16A) 1x IEC320 type C20

- 1x IEC320 type C19 (16A)
- 6x IEC320 type C13 (10A)
